| χ t   | he text has been establish      | ed by this Authorit                       | ty to read as follows:  |                |
| А   | method of identifyin            | g ligands to RNA                          | A polymerase sigma 70 subunit.  |                |
| 5. With regard to the abstract,   |                                 |   |   |                |
| t   | e text is approved as sub       | mitted by the appli                       | icant.  |                |
| ir.   |                                 | nay, within one mo                        | ule 38.2(b), by this Authority as it a onth from the date of mailing of this his Authority. |                |
| 6. The figure of the drawings to be   | published with the abstra       | ct is:                                    |   |                |
|   | is suggested by the applic      |   | X None of the fig   | ures.          |
|   | ecause the applicant faile      | ed to suggest a figur                     | <del></del>   |                |
|   | pecause this figure better      | characterizes the in                      | ivention.   |                |
|   |                                 |   |   | - 1            |

Box III TEXT OF THE ABSTRACT (Continuation of item 5 of the first sheet)

A method of identifying a ligand of a bacterial sigma  $^{70}$  subunit which comprises contacting the sigma  $^{70}$  subunit or a portion thereof comprising the anti-sigma binding region, with a test compound and a fusion protein of an anti-sigma  $^{70}$  factor of bacteriophage  $T_4$ , and determining whether the test compound binds competitively with the anti-sigma  $^{70}$  factor to the sigma  $^{70}$  subunit or portion thereof.

### PCT/SE 99/00979

## CLASSIFICATION OF SUBJECT MATTER

IPC6: G01N 33/569, C07K 14/35, C07K 14/01 According to International Patent Classification (IPC) or to both national classification and IPC

#### B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC6: G01N, C07K, C07K

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

# SE,DK,FI,NO classes as above

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

#### C. DOCUMENTS CONSIDERED TO BE RELEVANT

| Category* | Citation of document, with indication, where appropriate, of the relevant passages   | Relevant to claim No. |

| $\Box$ | Further documents are listed in the continuation | of Box C. | <u>Lx</u> | See patent family annex.            |
|--------|--|-----------|-----------|-------------------------------------|
| *      | Special categories of cited documents:           | "T"       | later     | document published after the intern |

- "A" document defining the general state of the art which is not considered to be of particular relevance
- erlier document but published on or after the international filing date
- document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- document published prior to the international filing date but later than
- national filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance: the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
